

PGT – Chemistry

The requirement of an educator with strong subject expertise, the ability to ensure conceptual accuracy, and competence in supervising practical components alongside structured academic planning.

Key Responsibilities

1. Postgraduate in Chemistry with B.Ed and 5–8 years of relevant teaching experience.
2. Teach Chemistry at the Senior Secondary level in accordance with the prescribed curriculum.
3. Deliver instruction with emphasis on conceptual clarity and systematic understanding of chemical principles.
4. Plan and conduct laboratory experiments, ensuring adherence to safety and curriculum guidelines.
5. Prepare students for board examinations through structured syllabus completion and evaluation processes.
